Professional Summary

Full-stack developer skilled in building end-to-end web applications using Next.js and React. Experienced in designing database schemas, building responsive UIs, and integrating third-party services like authentication and AI APIs. 100+ DSA problems solved with strong problem-solving fundamentals.

Technical Skills

Languages: C++, Java, TypeScript, JavaScript, C

Backend: Node.js, Express.js, REST APIs, Third-Party API Integration

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Shadcn UI

Database: SQL, PostgreSQL, Prisma

Tools: Clerk, Zod, Resend, Git, GitHub

Projects

VAANI - AI Voice Cloning Platform

June 2026 – Present

Next.js, React, TypeScript, shadcn/ui, Prisma, Clerk, Cloudflare R2, Polar

- Built a full-stack voice AI platform enabling users to choose from built-in preset voices or clone custom voices and generate speech from text, self-hosting the open-source Chatterbox TTS model and customizing inference logic based on project requirements
- Implemented voice management with file upload and in-browser recording, storing audio files in Cloudflare R2 and tracking metadata via Prisma/PostgreSQL
- Integrated authentication using Clerk and subscription billing with character-based usage metering via Polar
- Built a responsive UI with Next.js and shadcn/ui, with waveform audio playback using wavesurfer.js

SAVE - AI Powered Personal Finance Platform

May 2026 – June 2026

Next.js, React, shadcn/ui, Prisma, Clerk, Resend, Inngest, Gemini API, Zod

- Engineered a full-stack personal finance platform enabling users to track budgets, manage multiple accounts, and categorize transactions in real time
- Automated monthly financial reports summarizing income, expenses, net balance and AI-generated spending insights via Gemini API, alongside 80%-budget-threshold alerts - both scheduled via Inngest and delivered via Resend
- Built AI-powered receipt scanning using the Gemini API to auto-extract transaction details from uploaded receipts, reducing manual entry to a two-click confirmation
- Developed transaction analytics with Recharts, visualizing income, expenses, and net balance across 1/3/6-month views, alongside a filterable transaction table
- Implemented custom rate limiting to 5 transactions/minute on transaction creation using database-level checks to prevent abuse

Certifications

The Fullstack Developer Path

Feb 2026

Scrimba (108+ hours)

Education

Pillai HOC College of Engineering and Technology

2019 – 2023

B.E in Computer Engineering | CGPA: 8.75/10.0
